Upcoming Project Information

CITY OF BEACHWOOD PLANS CULVERT REHABILITATION ALONG CHAGRIN BOULEVARD

Project No. CUY-US 422-09.62 (PID No. 113100)

May 17, 2023 - The city of Beachwood, in partnership with Ohio Department of Transportation (ODOT), has proposed a project that will involve the rehabilitation of the existing box culvert that carries Mill Creek under U.S. 422 (Chagrin Blvd.) in Beachwood, Ohio. The rehabilitation will include the placement of a steel lining throughout the length of the culvert beneath the road-of-way, the construction of a new outlet headwall, and placement of rock channel protection. Additionally, a 30' diameter storm sewer and sidewalk will be replaced along the north side of Chagrin Blvd.

The project is scheduled to begin construction in early 2024 with completion by fall of 2024. During project construction curb lanes along Chagrin Blvd. may be closed to move equipment into and out of the work area. Road closures and detours are not proposed to construct the project. Detailed construction updates will be posted within the project limits and on the city of Beachwood's webpage, <https://www.beachwoodohio.com>, prior to the start of project construction. Access shall be maintained to all adjacent properties for the duration of the project.

The construction involved with the rehabilitation of the existing culvert will extend into the Highland Park Golf course. The City is working with the design team to minimize impacts to the golf course. There are no anticipated adverse physical impacts, nor interference with the protected recreational activities, features, or attributes of the property. Access to the Highland Park Golf course will be maintained during the duration of the construction.

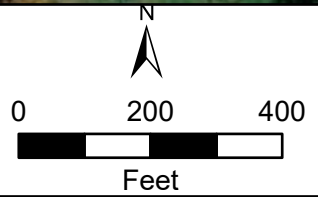

While the proposed project will not result in any substantial impacts to environmental resources, the city of Beachwood, is seeking any comments you may have regarding the proposed project. Project-related issues the public may wish to comment on include, but are not limited to, the effect of the project on residents, the local economy, historic or cultural resources, etc. To ensure your comments are considered during project development, please submit them no later than June 17, 2023 via the contact information below.
