Site Development Plan Approval

This request is for both preliminary and final site development plan approval to construct a playground on a portion of the existing parking lot. The property is zoned U-8 Industrial and Office Mixed-Use District. Child day care facilities are a permitted use by right in the U-8 District subject to compliance with the requirements of Section 1155.02. That code section requires the provision of an outdoor play area that is fenced and contains playground equipment.

The applicant is proposing to remove 18 existing parking spaces to create the required play area. The proposed play area would be 2,985 square feet in area and would have a variety of play equipment. The surface of the play area would be rubber mulch. The existing trees would remain. A wooden curb would be used to delineate the play area. The applicant proposes to enclose the play area with a board-on-board fence. The fence and play area would be protected from vehicles by the curb and a series of bollards. With the removal of the parking spaces as proposed, the site would still have 285 parking spaces, so the removal of the 14 parking spaces is not issue.

It is recommended that the Commission grant both preliminary and final site development plan approval subject to approval of the final design and drainage provisions by the City Engineer.

Site Development Plan Approval

This request is for both preliminary and final site development plan approval to located three (3) storage sheds on the subject site. The property is zoned U-5 Public and Institutional District. There is currently both a synagogue and a museum on the subject site. The three sheds are 12 feet X 16 feet and brown or tan in color. The applicant proposes to place at the edge of the north parking lot and the other two sheds adjacent to the south wall and the museum parking lot. There are no setback issues with any of the three locations and the sheds will not be visible from off the site.

It is recommended that the Commission grant both preliminary and final site development plan approval for the three sheds subject to the following stipulations:

1. The storage sheds be located a minimum of fifteen (15) feet from the main building;
2. The final siting be approved by the Building Commissioner and City Engineer; and
3. This approval is valid for a period of twelve (12) months from the date of approval, at which time the sheds shall be removed unless the applicant is granted an extension of time by the Planning and Zoning Commission.

RE: **P&Z 2024-20 Amicone Building & Construction
Kanhaiya Poddar

Rear Setback Variance**

This request is for site development plan approval for a rear addition which requires a setback variance. The property is zoned U-1 Single Family Residential District. The applicant is proposing to construct a rear addition of 420 square feet that is 28 feet deep by 15 feet wide. The subject site is 60 feet wide by 120 feet deep (7,200 square feet). Section 1113.03 requires a minimum rear yard setback equal to 30% of the lot depth. In this instance that would be 36 feet. The existing dwelling currently has a rear setback of 32.5 feet, or 3.5 feet less than the code requirement. The dwelling was constructed in 1953. Skylights were added in 2013, but the size of the dwelling did not change at that time. The front and side yard setbacks are code compliant.

The proposed plan would extend a portion of the dwelling to a rear setback of 19 feet. That would require a variance of 17 feet or 47% of the requirement. The proposed increase in buildable area would clearly also increase the amount of impervious surface on the property.

If the addition extended 14 feet, it would match the existing rear setback. That would still require a variance, and there would be a larger volume of home encroaching into the setback, but the distance to the rear property line would not be reduced.

While I understand that a lot depth of 120 feet limits the buildable area of the parcel, every lot on the east side of Edgewood has the same lot depth and all of the lots on the west side of the street have lot depths of 122 feet, while the houses on neighboring Brentwood have lot depths of 123 and 124 feet. So the circumstances are not unique to the subject parcel. The intent of the percentage of lot depth

approach to rear setbacks is provide some accommodation to residents who have shallower properties.

Section 1159.04 sets forth the criteria for area variances. The principal items of concern are that the variance is substantial and that the condition or circumstance is not unique to the subject property. It does not appear that this application provides the Commission with sufficient evidence to support a finding that a practical difficulty exists.

RE: **P&Z 2024-21 Superior Fence and Rail of Cleveland
Baywood Estates Condominiums

Fence Variance
Site Development Plan Approval**

This request is for both preliminary and final site development plan approval to located a vinyl privacy fence six (6) feet in height on the subject site. The property is zoned U-2A Attached Single-Family Residential District. The proposed fence would surround the outdoor patios of the two southernmost units of the condominium development. The intent is to shield the two dwelling units from the vehicular traffic on Bryden Road near its intersection with Richmond Road. Given the angle of Bryden Road, the two dwelling units are exposed to headlights as well as vehicular noise. The two patios have been screened with a board-on-board fence. The applicant is seeking a solid vinyl fence as a replacement. Section 1146.02(d)(9) prohibits solid fences in residential districts. In this instance, there is a unique circumstance where headlights from passing vehicles are directed at the patio area. The vinyl fence appears to be a reasonable replacement for the existing fence.

Since the variance is to Chapter 1146, the Commission has final authority to approve or deny the request. It is recommended that the Commission grant both preliminary and final site development plan approval subject to the following stipulations:

1. Pursuant to Section 1159.04 it is determined that a practical difficulty will result on the subject site from the literal enforcement of Code Section 1146.02(d)(9) with regard to the style of fencing.
2. Granting a variance to Section 1146.02(d)(9) to permit the installation of a solid vinyl fence six (6) feet in height to enclose the outdoor patios.

Site Development Plan Approval**

This request is for both preliminary and final site development plan approval to located an eight (8) feet high chain-link fence with a privacy windscreen along the rear property line of the subject site. The property is zoned U-3A High-Rise Apartment District. The proposed fence would be placed along the entire eastern (rear) property line. The proposed fencing is coated black galvanized with black privacy screening attached. Fences in U-3A Districts may be eight (8) feet in height where the abutting property is non-residential. In this instance the adjacent zoning in U-5 Public and Institutional District. Chain-link fences are permitted in rear yards. It appears that the fence as proposed complies with the requirements of Chapter 1146.

It is recommended that the Commission grant both preliminary and final site plan approval for the installation of approximately 966 feet of black galvanized chain-link fence eight (8) feet in height with privacy screening, along the eastern property line of the subject site with the final location as approved by the Building Commissioner and City Engineer.
